

Abstract

The invention relates to a candle with a container (1), which contains a transparent gel wax (3) and at least one wick (2) and the melting point of which is higher than that of the gel wax (3). The material of the container (1) is a transparent polypropylene or a transparent polyethylene or transparent plastic, each material having a melting point that is only slightly higher than the gel wax (3). The material of the container (1) can contain colored pigments (4).
